This the most useful information available to the golf course superintendent, course architect, and manager! It is written specifically for the golf industry, and gives you the tool you need to manage one of your course's most important assets--trees! Golf Course Tree Management will teach you the basic science, along with real world techniques to assist your in-house tree care program, to guide you in the selection of a qualified arborist and in the writing of comprehensive maintenance specifications. Protect your course's aesthetic beauty, quality of play, investment, and your job--this book shows you how!

"Within these pages is a wealth of practical information. Its arrival is long overdue. Refer to it to understand the maintenance requirements for trees. Let it help you write the specifications for a tree maintenance plan at your course. Use it to make the most important decisions involving your trees. Keep this book at your desk and let it serve you in the years to come!"
