Carolyn Harstad : Got Shade?: A "Take It Easy" Approach for Today's Gardener before purchasing it in order to gage whether or not it would be worth my time, and all praised Got Shade?: A "Take It Easy" Approach for Today's Gardener:

0 of 0 people found the following review helpful. I kept checking it out By Kaffe queen so I bought it,, library copy, little dinged up, but the information inside is quite useable... Carolyn writes like she's your over-the-fence neighbor with the garden you yearn for. 0 of 0 people found the following review helpful. The best! By realreader So glad to have this handy reference. We have so much shade! This book has so many helpful hints about the plants we already have as well as what we might purchase next year! I have a difficult time putting it down. 0 of 0 people found the following review helpful. Two Stars By Daniel Sokolow Just ok

A masterpiece, full of charm and humor." Dr. Rebecca W. Dolan, Director, Friesner Herbarium, Butler University Whether its urban, suburban, or rural, nearly every property has some shade, if only on the north side of the house. Countless more are "blessed" with giant trees planted decades ago that screen out the sunlight. Under such conditions, you may think that its impossible to have an interesting garden without a lot of work. Not so if you are willing to learn about the plethora of easygoing horticultural gems that dont require full sun. Most gardeners think only of impatiens and hostas for their shady areas, but shade gardening can be far more interesting, and even exciting and you need not work too hard at it if you incorporate some lesser-known but easy-to-grow plants into your landscape. Judiciously mixing the common plants with the more unusual ones can help the busy, tired, or lazy gardener create a special and unique retreat. Carolyn Harstad, author of the best-selling *Go Native!*, organizes this book around the principle that an interesting shade garden is well balanced and has a variety of plantings. Early chapters focus on designing the low-maintenance garden. Further chapters discuss small trees, shrubs, dwarf conifers, vines, ground covers, ferns, grasses, perennials, woodland wildflowers, spring bulbs, and annuals (yes, there are annuals that enjoy shade!). She discusses hundreds of shade-tolerant plants hardy in Zones 4-8, suggests how they may be used and combined, and recommends methods to reduce garden maintenance a universal concern in this fast-paced world. With its informative text, accurate drawings, and colorful photographs, this book is a "must have" for gardeners across much of North America.

This is an exciting book for gardeners tired of ubiquitous hostas and ferns in shade gardens. (Library Journal) "This is the best new book on shade since George Schenk's classic *The Complete Shade Gardener*." (Fine Gardener) With its informative text, accurate drawings, and colorful photographs, this book is a 'must have' for gardeners across much of North America. (Booked Solid with Virginia C) About the Author Master Gardener, nature photographer, and popular lecturer, Carolyn Harstad is a member of the Garden Writers Association of America and a Landscape Design Consultant. She lives in Minneapolis. Jean Vietor graduated from Indiana University in Fine Art. She has exhibited mostly nature paintings for 33 years.
