**Marnie Reed Crowell : Greener pastures** before purchasing it in order to gage whether or not it would be worth my time, and all praised Greener pastures:

From the Christian Science Monitor, "With a dexterity and tact that are really functions of character and sensibility as much as style and control, Marnie Reed Crowell manages handsomely to avoid the bogs, swamps, and pitfalls that beset nature writers." Follow Marnie and family through a year of living on their farm at the edge of the Adirondacks in 1972. 288 pages with 6 bw photographs
