Mr. Richard B. Votapka : How to Build a Do-it-yourself Garden Enclosure with Removable Sides Rear Panel before purchasing it in order to gauge whether or not it would be worth my time, and all praised How to Build a Do-it-yourself Garden Enclosure with Removable Sides Rear Panel:

This is a detailed do-it-yourself 48 page booklet with step by step instructions, detailed drawings, photographs, bill of materials, and alternatives on building an 8' x 8' garden enclosure whose sides can be removed for access to the garden without having to step inside. It is designed to keep animals and birds out so the plants will not be eaten by them. It was inspired by an engineer's wife who just wanted a simple enclosure to keep out the wildlife but resulted in an

innovative design for a backyard garden.
