These plans are designed to build and affordable floating dock, pier or deck on the pond. Believe me when I say that it is well worth the effort because it allows you to enjoy your pond so much more. All the days and nights that we have spent on our dock, sitting, fishing, wading our feet, jumping into the water and enjoying a day outside with family and friends has brought us countless memories and many happy times, and I am sure that it will do the same for you.
