How to Build Paths,Steps and FootbridgesBy Conrad DuBoisThis book has lots of examples how to build paths which can be used for formal entrances to garden paths.I need this for building flag stone paths both at the front and the back.Also this book gives examples of how to build steps.I have picked some steps that I want to build on a hill by my house.The bridges are good bridges however they only have 3 examples of bridges which the author could have added a couple more bridges.I would recommend this book for someone looking to build paths and steps.The bridges are almost an after thought.They come up short on bridges.Have fun building your project.3 of 3 people found the following review helpful. Excellent Footbridge InformationBy Eric RI have a forest property with a creek and plan to build a bridge to make it more accessible.I have searched through several book sites including Google books and this is the only book I have found which gives small bridge building

information to homeowners. The plans appear detailed and I am grateful for them, though I have not built yet so cannot confirm their accuracy and thoroughness. A great start. One remaining question is, weight limit is not indicated, and my concern is being able to travel over the bridge with an ATV pulling a wood chipper, perhaps 600 pounds. The information on paths and steps is also detailed. 18 of 18 people found the following review helpful. A Landscape Architects View By John W. Campbell Outstanding selection of photos defining numerous material selections and their designed use. Paramount to the process is Peter's description of the planning and design process. Easy to follow, thorough, and it leads the amateur and professional through the initial idea(s) to a well defined project - bricks and mortar. The step by step direction tool(s), material(s) and know how should result in a successful project for friends and family to enjoy and rave about. Just look at the pictures. HUNGER!!! A wonderful book for young and old, amateur and professional. JOHN W. CAMPBELL Landscape Architect
