Design Museum : How To Design a Light (Design Museum How to) before purchasing it in order to gage whether or not it would be worth my time, and all praised How To Design a Light (Design Museum How to):

It doesn't detail anything about how to actually design a light. Nothing about sourcing materials, fabrication, or even really about how one goes about designing in theory. It never addresses anything technical in any way. Nothing about electricity other than that lighting designers need to really know their stuff because it's dangerous. The back of the book jacket reads "How to design a light tells you everything you need to know..." Are you kidding me? At only 100 pages, I knew this book wouldn't be extremely comprehensive, but I thought at least I'd get some information about how to actually go about designing a light. God

I'm glad I bought this used...0 of 0 people found the following review helpful. Waste of moneyBy Joel Chesney
Seriously, did they bribe some high school drop outs to put this book together. Major disappointment and not a worthy resource. I can find better information in an hour using Google. Images are typical and content is reads like a Sunday edition newspaper--Boring!

I have to say this is one of the best books I have ever purchased.Perfect for designers, it discusses every little detail about the process of designing a light, and it also includes a great overview of the notable pieces of lights through the history of lighting design.Really great book! And all the others from this series are as good as this one.I highly recommend it.

How to Design a Light tells you everything you need to know and looks at the principles and processes of designing a light.In a working case study Arnold Chan, one of the world's best-known lighting designers, traces the design and development of one of his installation at the London restaurant Hakkasan, and reveals exactly what is involved in creating a successful design.

About the AuthorThe Design Museum's mission is to celebrate, entertain, and in form. It is the world's leading museum devoted to contemporary design in every form from furniture to graphics, and architecture to industrial design. It is working to place design at the centre of contemporary culture.
