5 of 5 people found the following review helpful. Misleading title, disappointing contentBy gnThe most misleadingly titled book ever. It tells you how to fix a very few, very specific things that will rarely come up in your life. Most of the book is filled with projects that range from pretty neat to ugly and useless. Also, it appears that there is nothing in this book that isn't available in more detail on their website. Very disappointing.1 of 1 people found the following review helpful. The rest is like how to fix a GI Joe and How to ...By Silentkripp13dThis book has literally only two or three actual housing repair guides. The rest is like how to fix a GI Joe and How to patch your jeans. I only purchased this book because it says, 'A HOMEOWNERS' guide. I figured it would show how to fix some electrical issues, some plumbing, possibly patching a roof, etc.NOPE! None of those are in this book. To me, this was very misleading and a complete waste of my time and money.1 of 1 people found the following review helpful. BookBy SandraHad to send
