It's got techniques for cutting joineries as well as sharpening your hand tools. So I learned quite a bit as a beginning woodworker. I didn't give 5 stars because he has a lot of power tools that I can't apply to my woodworking, i.e. jointer and planer. I can't afford those, so I try to work with the things I have.2 of 2 people found the following review helpful. Hand tools or power tools? How about a

hybrid!By SpookyMarc Spagnuolo has created a book that is great for any woodworker who is experienced or just getting started. If you have lots of experience with power tools or hand tools, this is still an interesting book. Marc writes in a way that is likeable and entertaining. I learned quite a few things and have come to respect different tools in a way that I didn't before. This book does go into power tools in detail and hand tools in detail. If you have ever questioned whether you should only use one or the other, or a combination of power or hand tools, give this book a gander.3 of 3 people found the following review helpful. I love hand tools but have hand issues so some jobs ...By Michael ShawI love hand tools but have hand issues so some jobs are just tedious. Hand planing boards flat is just out of the question for me. Besides I love my jointer and planner. This book teaches a combination of both. Hand and power tools to achieve what you want. Besides in the end it's what you have built that will impress people and not what tools you have used to do it.

A faster route to handcrafted results!In the last few years, there's been a push to return to the roots of woodworking when every step was done with hand tools--from resawing lumber and planing it flat, to cutting joints and creating profiles. Working this way can produce beautiful results, but is it the best method for woodworking in the 21st century?In Hybrid Woodworking, author and Internet woodworking star Marc Spagnuolo offers a more efficient approach that combines the strength of power-tool and hand-tool techniques. The end result: You save time and effort while producing furniture that still has that stunning handmade look.The Hybrid SystemHybrid Woodworking will show you which machines and power tools are best for the grunt work of furniture making. It will explain which hand tools are essential for fine-tuning. And best of all, it will demonstrate techniques for working flawlessly and efficiently with every machine and tool in your shop.Making beautiful furniture can be immensely gratifying. By adopting the hybrid woodworking system you can get to that satisfying end result with less effort while enjoying every step along the way.
