**Jacob Adams : Hydroponics: A Guide Book You'll Regret Not Reading** before purchasing it in order to gage whether or not it would be worth my time, and all praised Hydroponics: A Guide Book You'll Regret Not Reading:

0 of 0 people found the following review helpful. Very useful and detailed guide By Sanjin I have tried hydroponics before and it didn't really work for me, but I want to give it another shot. That is why I got this guide. So far, I like it. It explains every step of the way, it is written for beginners like me and I can tell that the author knows what he is

talking about. There are some helpful pictures and diagrams in the book and all in all, it is a well-written and structured guide. It is too early to tell if I will actually manage to grow anything in my hydroponics garden, but I have faith so we will see. 0 of 0 people found the following review helpful. ... hydroponic gardening topic and I think this is a good beginners book. By Good man The book introduces the hydroponic gardening topic and I think this is a good beginners book. The only thing I did not like about it is the last 25% of the book are the pages with the links to the other books. I expected all pages will have the content on the subject of hydroponics. Other than that everything was ok for a beginner like me. 0 of 0 people found the following review helpful. Highly recommended. By William I've been into Hydroponics for quite some time now. I've read a lot of books and kept some of them actually as my reference whenever I needed one. So far, by self evaluation I think I am into the right way of perfecting my Hydroponic system yet I still wanted to learn if there are still things needed to be learned. That is why I got this book for the purpose of enriching my knowledge towards the system and indeed this book is truly a regret not reading it as I still gathered quite a few points where I missed out with my other books. It really is true that it pays to read as I have now added knowledge to further improve the system that I have been doing now, thanks to Jacob Adams for a job well done. Highly recommended.

There are a lot of benefits of hydroponics gardening: 1.No yard needed with hydroponic systems 2.Year round growing with hydroponic gardening 3.High production rate 4.Affordable 5.Environmental friendly 6.Better taste and nutrients. It also provide you a way to enjoy quality family time and plan family activities to create laughter, memories and strong family bonds.
