Mickey Leavitt : Hydroponics: An Introduction To Home Hydroponic Gardening before purchasing it in order to gage whether or not it would be worth my time, and all praised Hydroponics: An Introduction To Home Hydroponic Gardening:

2 of 2 people found the following review helpful. Great Visuals and Examples!By Brent AllenAs an avid gardener, I'm always looking for new ideas for gardening. Each year, I try something new with my garden. Last year, I planted banana trees (musa basjoo variety), two years ago I planted peanuts, three years ago I defied my latitude with growing

palm trees. This year I'm going to be growing a hydroponic garden. Specifically, I want to grow a hydroponic garden to grow the ingredients for salsa. This book was fantastic. I especially enjoyed the visual examples and different methods of hydroponic gardening. If you're interested in gardening or want to try a new/fun way to grow your plants, this book is for you. I HIGHLY recommend. 5 stars.3 of 3 people found the following review helpful. You Can Grow Your Own FoodBy All Day!This book introduces you to the distinctive types of hydroponic systems, how to create your own, what you can grow hydroponically, and the advantages of this particular garden along with a host of other valuable information. The pictures are truly an asset to the material. This small investment is well worth your time and energy. This book is recommended to anyone who is interest in starting your own hydroponic garden.0 of 0 people found the following review helpful. hydroponic sillinessBy Cliff RaymondSome useful information but frustrating, plus some awfully silly suggestions.On page 51, for example: "You must always maintain the air temperature around 10 to 15 degrees at night." I assume he means Celsius, which is 50-59 degrees F, but that's a ridiculously narrow range (especially in Texas). Then on page 52: "Always check whether the temperature is 76-80 degrees..." Here I assume he means Fahrenheit, but that range is even narrower. (On page 54 he hints how important it is to use correct units. Go figure.)And how about this tip for visitors from page 56: "Always ask your folks to shower and wear a new set of clothes before they enter your garden."Yeah, right. How about issuing them a bio-hazard suit, too?I could cite several other examples, but why bother? It was hard to take anything seriously after that.

Learn How To Set Up A Hydroponic Grow System! Purchase your copy of Hydroponics: An Introduction To Home Hydroponic Gardening today - Don't Wait!
