**Milton Meckler : Innovative energy design for the '90s** before purchasing it in order to gage whether or not it would be worth my time, and all praised Innovative energy design for the '90s:

This comprehensive reference describes innovative design practices which will improve efficiency and cut utility costs. It contains new computer approaches to assist the reader in evaluating HVAC systems and optimizing performance, and in learning how to calculate daylighting requirements and benefits, and in the application of cost-effective evaporative chilling techniques.
