Jamie Durie's Inspired is exactly that for anyone who enjoys the outdoors and desires design elements and intergration of the indoors/outdoors. I have several of his books and Inspirations sits among my favourites for ideas and general inspirations to daydream about what is possible..A must have for anyone who wants more from their outdoor space or just needs some ideas..0 of 0 people found the following review helpful. Truly INSPIREDBy So Many ToolsAs a fan of the show my wife asked me to buy these for her for some garden inspiration...I did and then found myself flipping thru them...great photography, good explanations that walk you thru the ideas and help you lay out your own takes on them if you so choose.....ended up buying his other books and plan to tackle a spring project INSPIRED by his designs...0 of 0 people found the following review helpful. InspiredBy Land_JetVery good, wish it had a few diagrams to help show design aspects a little more. Great pictures and makes a

good inspiration book.
