**ISO TC 118/SC 3/WG 3 : ISO 8662-10:1998, Hand-held portable power tools - Measurement of vibrations at the handle - Part 10: Nibblers and shears** before purchasing it in order to gage whether or not it would be worth my time, and all praised ISO 8662-10:1998, Hand-held portable power tools - Measurement of vibrations at the handle - Part 10: Nibblers and shears:

This part of ISO 8662 specifies a laboratory method of measuring the vibrations at the handles of hand-held pneumatically or hydraulically driven nibblers and shears. It is a type-test procedure for establishing the vibration value at the handles of the power tool when operating on a specified load. It is intended that the results be used to compare different power tools or different models of the same type of power tool. With the operation specified for the

power tools, the values obtained will give an indication of those found in real work situations.
