**Connor Dayton : Jackhammers (City Machines)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Jackhammers (City Machines):

Jackhammers pound through cement and rock and are one of the most recognizable (and audible) machines at construction sites. Machine-loving readers will build vocabulary as they learn how jackhammers work and the significant jobs they do. Action-packed photographs show jackhammers making fast work of blocks of concrete and rock.
