By David Arbogast This set of pattern books is for the true collector of arcane nineteenth-century pattern books. John Hall was representative of the general craftsman of the early nineteenth century who had skills in geometry, furniture-making, and architecture, but not to the extent that he was propelled into the limelight with the luminaries of those three areas of expertise. His pattern books did not break any new ground, but are quite interesting in providing essential background information for the three genres of expertise at that time.
