Lee Mothes : Keep Out!: Build Your Own Backyard Clubhouse: A Step-by-Step Guide before purchasing it in order to gage whether or not it would be worth my time, and all praised Keep Out!: Build Your Own Backyard Clubhouse: A Step-by-Step Guide:

4 of 4 people found the following review helpful. It really works!By VuzzboxI'm building the basic clubhouse with my 11 year old son this week and this book is excellent. The plans and the step-by-step layout of the chapters with illustrations are excellent and thorough. Every day, I ask my son to read through the next chapter/steps and we commence with the building. I have built a few things in my day, but nothing end-to-end like this, so it's helpful for both of us, really.What I like about the clubhouse design is that it is based on standard lumber sizes: 4'x8' plywood, 6' 2x4's, 8' 4x4s, for example. This minimizes the amount cutting required and maximizes the use of materials.Highly recommend it.0 of 0 people found the following review helpful. I finally stumbled across this amazing book! The author not only shares his knowledge ...By LauraAfter searching the internet extensively for information on building a clubhouse, I finally stumbled across this amazing book! The author not onlyshares his knowledge of building

clubhouses and other shelters from his own experience, but offers very detailed information about the tools and materials needed, along with easy to follow building instructions. Another aspect of this book that I truly value is the author's encouragement and enthusiasm, which largely helped to propel me in getting started with the project. 2 of 2 people found the following review helpful. Fabulous! By AMKI currently have TWO which will be given as gifts! One for DH for Fathers Day and one for my Godson (a 13year old) for his May birthday! This was exactly what I was looking for as a gift for a few handy builders in my life. I look forward to seeing all the Clubhouses built with the help of this fun book. PS.. When I was first introduced to the book and discussing it with some of my local friends we were of course enamored by the clubhouse for our kids! But we were also selfishly thinking about ourselves.. I could make one just for my Spinning Studio!, Someone else said, . Gardening, .. Dyeing, "... Yoga", .. Photography, .. Books, etc.. You get the idea.

Build your own unique backyard playhouse. In this inspiring guide, Lee Mothes shows you how easy it is to construct the hideout of your kids dreams. With simple step-by-step instructions and plenty of innovative ideas to engage kids throughout the building process, the whole family can get involved in the fun. You'll love constructing a personalized clubhouse with your kids, and your kids will enjoy playing in it for years to come. Just don't forget the secret password.

filled with nostalgic charm, the projects are cleanly broken down and quite manageable, with lots of tips for both kids and adults. Any interested kid or adult can build a clubhouse with this book in hand. Fantastic advice and encouragement make each project approachable. A great addition to any building collection highly recommended.
