It's 243 pages long,8" x 8 1/2" and 3/4" thick, not a flimsy book that will fall apart.It has alot of information about how to diy, and materialsto use in building a treehouse. It will be one of my go-toresources when I get down to it. Plenty of info about tree selection,which is the first important step in planning. I couldn't find many reviewson it, but I took a chance buying and was not disappointed. I gave it 4 stars becausethere is no 4.5, and I would recommend as part of a collection of resource materials.0 of 0 people found the following review helpful. DisappointedBy Daniel MarshallRepeats same information over and over. Doesn't appear to know the use of some tools. Seems information was collected from many sources without having learned from doing it himself . Some information seems misleading as the picking your tree section.0 of 0 people found the following review helpful. Four StarsBy Paige ParkerI bought this as a gift and it was well received.
