Carrol L. Henderson : Lakescaping for Wildlife Water Quality before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lakescaping for Wildlife Water Quality:

0 of 0 people found the following review helpful. One of the most useful guides to living and landscaping on a lake or ...By Bonnie Lore One of the most useful guides to living and landscaping on a lake or river, ever written. I wish every State had one like it. The principles apply to all the Country, however. 0 of 0 people found the following review helpful. Best book for landscaping water frontage By onestop This book is a collaborative effort by many experts on the subject of waterfront landscaping. It shows how you can design your property to be functional and beautiful for humans, while at the same time, providing a high quality habitat for wildlife. The book includes extensive native plant lists for all moisture levels - submergent to dry. It is very well organized and all encompassing. You will not need another book for your waterfront landscape design because this book covers it all. Highly recommend! 0 of 0 people found the following review helpful. Clear, concise, necessary! By Susana Geraldine I wish this book was mandatory

reading for all lake homeowners. Not everyone would want this type of landscaping for their lakeshore, but this book at least informs them of why this type of landscaping is important for the health of their lake and for the ecosystem services provided by a healthy lake and surrounding habitats.

This book shows to plan and plant a diverse natural lakeshore landscape. Features information on how to restore wildlife habitat, wildflowers and clear water--preserve or restore the natural beauty that attracted you to lakeshore living in the first place. The principles and techniques in this book are also applicable for landscaping along rivers, streams and wetlands. Also features lakeshore rules and regulations for Minnesota, Wisconsin and Michigan.

About the AuthorCarrol L. Henderson is supervisor of the Non-game Wildlife Program at the State of Minnesota Department of Natural Resources. Carolyn Dindorf has worked with lake associations and individual homeowners to plant and initiate lakescaping projects since 1992. She has also worked for the State of Minnesota Pollution Control Agency and the Hennepin County Conservation District. Fred Rozumalski is a landscape ecologist who strives to design and restore native landscapes with an order and beauty that even the casual visitor can appreciate. He is a landscaping ecologist at Barr Engineering in Minneapolis, Minn.
