Do NOT buy this book if you live in Southern or Southwestern states!By SoDiOn the back cover of this book (but unfortunately not in the item description or I would not have bought the damn thing!) it says in large letters "Featuring grasses and solutions for the central and northern United States". See the image at the top of the product page that I uploaded of the back cover. Now maybe I'm being a little

picky because I happen to live in a warm climate, but I think that information was rather important and should have been included as a subtitle of the book or at the very least in the description, not hidden on the back cover!!4 of 8 people found the following review helpful.
