From Brand: Sandow Media : Leading Residential Landscape Professionals (The Perfect Home) before purchasing it in order to gage whether or not it would be worth my time, and all praised Leading Residential Landscape Professionals (The Perfect Home):

2 of 3 people found the following review helpful. Beautiful New Book of the Best Designs By John Matlock This spectacularly illustrated book show the best of what is being done in landscaping today. It features the work of some 30 landscape designing firms from around the country. All areas of the country are represented from the desert southwest of Arizona and Nevada to the harsh climate of Alaska, where the featured designers have spent a quarter century selecting and developing plants that will thrive in that area. It includes formal gardens and designs where the ocean comes right up to the patio. Water is used in other designs as well from designs where the infinity edged pool leads the eye to the skyline of the city beyond, or where a lazy, slow moving river provides an ever changing view. This is primarily an idea book where the designs photographed here can be used to give you ideas of what you want in your design. Secondly it provides a guide to selected landscape architects and an illustration of the work they are capable of doing. Perhaps you'll select one of these 'artists,' but if not, you'll have something by which to compare the work of the firm you select. This book is beautifully printed, using beautiful photographs and bound to hast a lifetime.

Inspired by nature, landscape architects and designers transform open spaces, creating functional, artistic gardens and outdoor rooms through a variety of plants, water elements, and hardscapes. **Leading Residential Landscape Professionals** is an exceptional collection featuring the works of leading landscape professionals and profiling the men and women who create these marvelous outdoor spaces. The designs, from all areas of the country, include formal country gardens, urban sanctuaries, contemplative water scenes, and seasonal settings. This stylish resource includes ideas and garden features that can be adapted to large and small yards, for those planning to landscape a home or those who are simply passionate about their home and garden.
