Malene Birger : Life and Work: Malene Birger's Life in Pictures before purchasing it in order to gauge whether or not it would be worth my time, and all praised Life and Work: Malene Birger's Life in Pictures:

How many of us have the finances to keep moving about and accessories such as Chanel, Louis Vitton, etc - I was disappointed, it is a coffee table book for a designer boutique. 2 of 2 people found the following review helpful. Not worth the price. By Diana I bought the book for my birthday. Veeeery pricey and not worth it. It IS made well and has beautiful pictures, but it's really enough flipping through it once or twice. It is not informative or particularly inspiring... at least for me (an interior designer). Most of the images are on the internet. Disappointed. 8 of 8 people found the following review helpful. Fabulous Book. By Anne This book is worth every penny! It's a great coffee table book and I've enjoyed looking at it again and again since I purchased it a month ago. Malene Birger's photos need no explanation. The best thing about this book is that the style of the rooms doesn't have to reflect your own aesthetic for you to be able to appreciate them. I always come away with new resources and inspiring ideas for future projects and I hope you do too!
