Christa Santen : Light Zone City before purchasing it in order to gage whether or not it would be worth my time, and all praised Light Zone City:

0 of 0 people found the following review helpful. Educative and Give A Lot of IdeasBy Poppuhaha from BangkokWell it is a very good overall reading for outdoor lighting design, but I gave 4 stars because it is not what I was looking for exactly.0 of 0 people found the following review helpful. excellentBy rleaoExcellent book. It presents photos of streets and squares in the day and at night to compare their ambience and atmosphere. The technical speech is exactly what needed to be.

In this book, the author embodies her many years of experience as a practitioner and teacher of lighting design. She articulates basic planning rules for the outdoor lighting of buildings, traffic routes, and squares, and presents and elucidates new artificial lighting systems and outdoor lamps with the help of examples.
